The Mercedes-Benz 500K (W29) is a grand touring car built by Mercedes-Benz between 1934 and 1936. There were only 342 produced. Distinguished from the 500 sedan by the "K" for Kompressor (German for supercharger), it succeeded the Mercedes-Benz 380. It offered both a larger, more powerful engine which was a supercharged inline 8 and a extravagant interior to meet customers' demands for greater luxury and performance. All models featured advanced equipment such as safety glass, hydraulic brakes, and a 12-volt electrical system sufficient to bear the load of the electric windscreen wipers, door locks, and indicators. While most of the cabriolets, sedans and touring models came with a wheelbase of 3290 mm (129.5 in), the Special Roadster came with a shorter wheelbase of 2980 mm (117.3 in) for higher performance. Today, the cars remain highly prized for their heritage and scarcity.

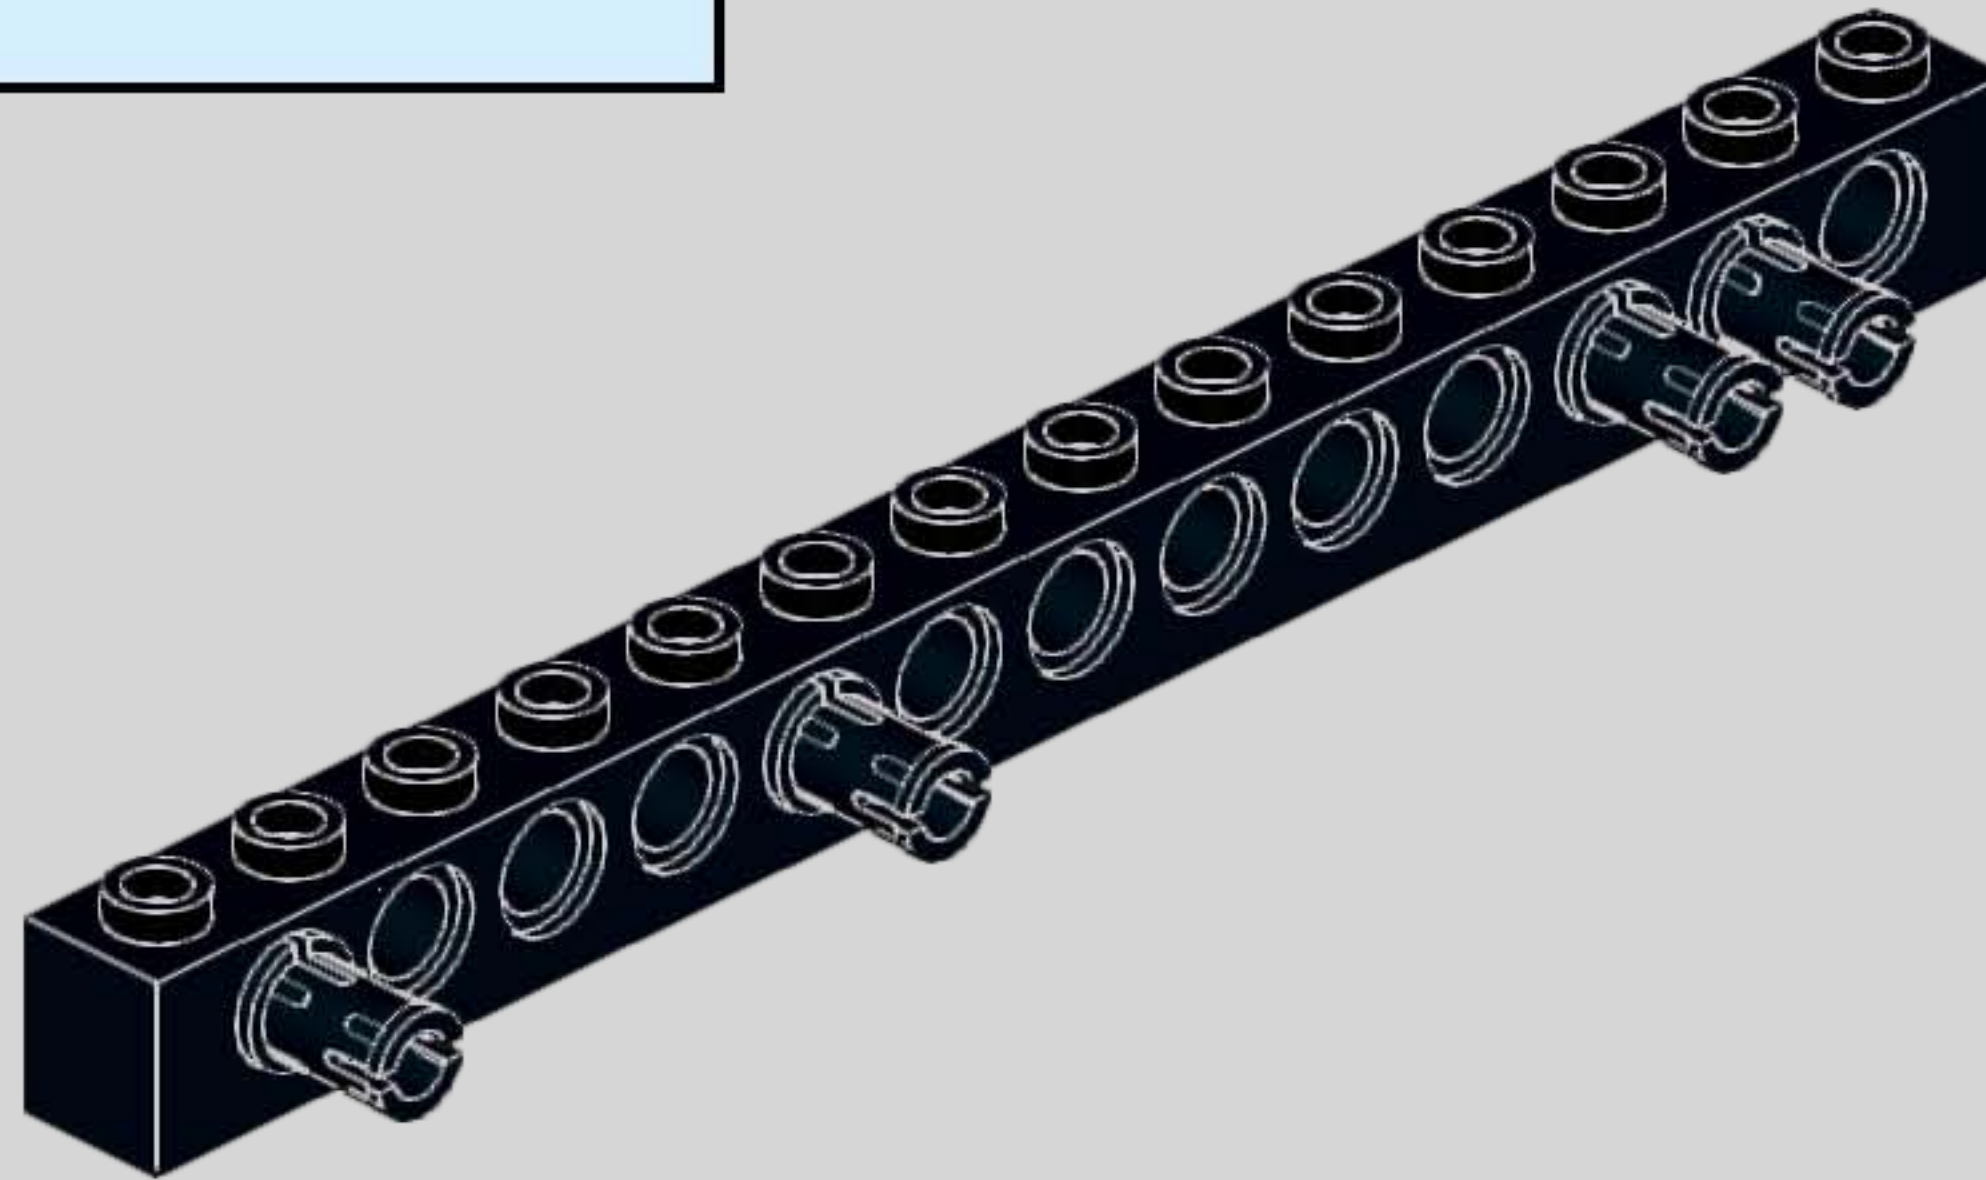

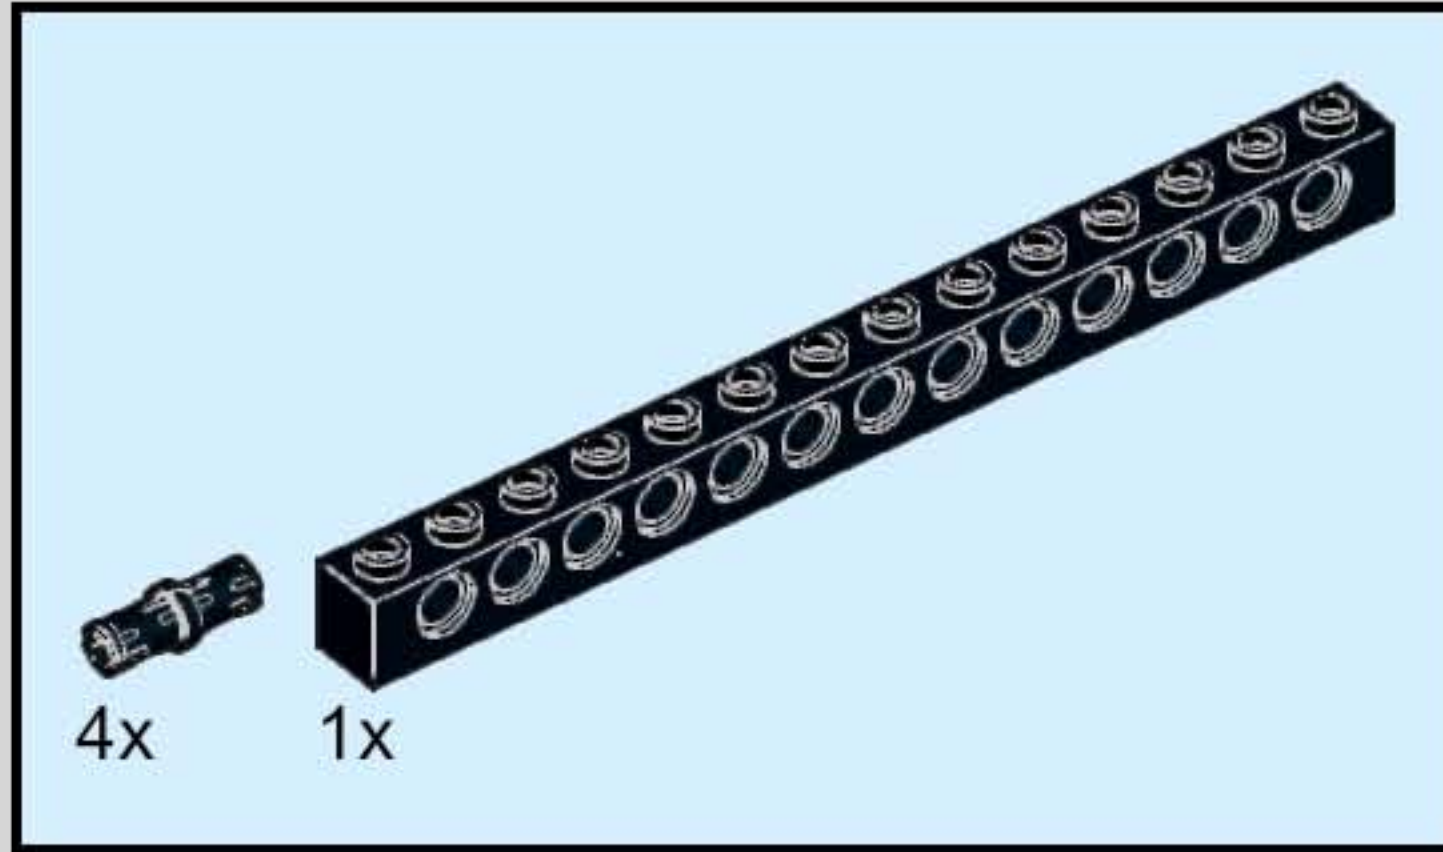

**I HOPE YOU ENJOY BUILDING THIS MODEL
AND THANK YOU FOR YOUR SUPPORT!**
